- API Development

## Work History

### Line Cook

*Cactus Club Cafe, Coquitlam, BC*

*April 2023 - Current*

- Ensured consistency and quality in repetitive tasks by creating identical dishes numerous times daily.
- Optimized workflow and productivity by setting up and preparing cooking supplies and workstations efficiently during opening and closing.
- Trained and mentored new staff in proper procedures and best practices.

## Front-End Web Developer

*Matin Communication and Research, Shiraz, Iran*

*February 2021 - December 2022*

- Researched and integrated emerging web technologies to enhance site functionality and user experience.
- Developed responsive features for mobile and desktop platforms using HTML, CSS, and JavaScript.
- Contributed to Scrum projects, improving efficiency and ensuring timely delivery.
- Designed and optimized layouts for usability, performance, and accessibility.

## Wordpress Developer

*Freelancer, Shiraz, Iran*

*May 2019 - December 2020*

- Created and updated re-usable code libraries to streamline WordPress development cycle.
- Utilized deep knowledge of WordPress core to customize admin and theme components.
- Converted design assets into component-based HTML, CSS and JavaScript.

## Information Technology Support Assistant

*Oil Industries' Commissioning and Operation(OICO),  
Asaluyeh, Iran*

*March 2018 - March 2019*

- Provided front-line technical support, troubleshooting hardware and software issues for end-users.
- Performed regular system updates and maintenance to ensure optimal performance and security.
- Assisted in training staff on the use of various software applications and IT systems.
- Responded to help desk requests, resolving technical issues promptly and effectively.

## Backend Developer

*Notrino Web, Shiraz, Iran*

*March 2014 - August 2016*

- Utilized version control systems like Git to manage codebase and collaborate on projects effectively.
- Developed robust server-side logic to handle business processes and data manipulation.
- Defined and maintained databases to deliver responsiveness to data client requests.
- Developed server-side logic in PHP and Laravel.
